

# Quick Change Magnets

Commonly known as QMC (Quick Mold Change) and QDC (Quick Die Change) Magnets have established themselves as the most flexible option with the very little maintenance and running cost.

DocMagnet designs magnets for all press applications taking particular care of the specific needs of the customer.

Once the particulars of the press and mold/die are known, DocMagnet will provide a full proposal complete with engineering drawings with very quick turn-around.

**DocMagnet Quick Change Systems** boast the following features:

**Permanent-Electro Magnet Technology:** failsafe and everlasting performance.

**Low Shut height:** each platen is less than 2" thick maximizing daylight.

**Maximum force:** there is no fixed pole size or design. Poles are determined and strategically placed to provide the right clamp capability in full consideration of the application requirements.

**Safety through interlocking:** at no time will the operator be near the press during the clamping process; built-in sensors are provided to monitor the application, and the control system has a permanent communication to the machine.
